Content Development Roadmap 2021

Welcome to our Content Development Roadmap

Our future content development is based on our own extensive research, coupled with feedback from our partners regarding the training titles they will be creating over a 12-month period.

This Content Development Roadmap lists the Practice Labs and/or Exam Preps (**EP**) scheduled for development this year and gives an indication of when we expect them to be available for purchase.

Alongside this we are indicating how far along the development process titles are. For example, a project will begin as **planned** and then move into **development** once more extensive work takes place.
